

The Garden Copper

Stop Mollusc Crime in Your Garden

Description:

Use **KnitMesh Technologies®** Garden Copper to prevent slugs and snails from ruining the plants in your garden. The natural charge in the copper repels the unwanted creatures, and yet is harmless to other birds and wildlife.

Deter Slugs and Snails with The Garden Copper

- Copper mesh repels with a natural charge
- Repels slugs and snails, does not kill them
- Harmless to birds and other wildlife
- Use as ground cover, under and on pots & containers
- Use around plants, shrub stems and tree trunks
- Leave in place for year-on-year protection

- Robust copper wire mesh - not flimsy copper tape
- Pure metal product - not degradable fabric material
- Manufactured in flattened copper wire for added copper surface area and increased deterrent levels

Standard Pack Sizes

The Garden Copper is supplied in rolls approximately 120-140mm wide, and in packs of 9 x 5m long or 2 x 50m long rolls.

Issue No 02 (05/14)

The information provided above is supplied in good faith and believed to be correct. This information is supplied upon the condition that persons receiving this will make their own determination as to its suitability for their purposes prior to use. KnitMesh makes no representations or warranties, either expressed or implied with respect to the information or the product to which this information refers.

How To Use

- Cut sock down one side and open out
- Splitting the sock doubles the available surface area
- Cut to required size (length or width)
- Place on or around plant/item to be protected
- Not reliant on adhesive
- Secure by hooking stitches together
