

# Thermal Insulation Mesh

## Description:

KnitMesh Technologies® thermal insulation mesh provides a cost-effective, widely used means of sheathing and structural reinforcement for numerous industrial thermal insulation materials.

The mesh protects the industrial insulation from abrasion and general fibre break-up through handling, vibration and long-term deterioration.

## Applications

Combining knitted wire mesh with industrial insulation enables the creation of easily handled semi-rigid sheets, flexible blankets, seals and gaskets.

Formed into interlocking asymmetrical loops of wire, thermal insulation mesh offers superb 'spring back' and resilience.

With almost unlimited applications for sheathing high temperature insulation materials, thermal insulation mesh is widely used across the aircraft, nuclear, automotive, marine, gas and fire protection industries, as well as for oven, boiler and furnace door seals.

## Material Specification

Approx. Working Temperature (°C)	Material
400	Stainless Steel 304L/306L
800	Stainless Steel 321/347
1050	Stainless Steel 310 Incoloy DS
1050+	Inconel 601*
1250	Nickel Chrome 80/20
1250+	FeCrAlloy**

\*Inconel is a registered trademark of Special Metals Corporation, USA.

\*\*FeCrAlloy is a registered trademark of Kanthal AB

The information provided above is supplied in good faith and believed to be correct. This information is supplied upon the condition that persons receiving this will make their own determination as to its suitability for their purposes prior to use. KnitMesh makes no representations or warranties, either expressed or implied with respect to the information or the product to which this information refers.

## Features & Benefits

- Resistant to temperature extremes
- Increased flexibility and resilience through interlocking loop structure
- Superb mechanical strength enabling re-use
- Accelerates installation and eases fitting in restricted areas
- Custom-manufactured for your specific application
- Can be formed to fit almost any shape
- Wide range of materials to suit temperature and corrosion requirements

## Mesh Sizes

KnitMesh Technologies thermal insulation mesh is available in a wide range of sizes.

## Quality Assurance

KnitMesh Technologies® is accredited to ISO9001:2008, ISO14001:2004, OHSAS18001:2007, PAS 99:2012 and ISO/TS 16949:2009
