

Animal/Bird Enclosure Mesh

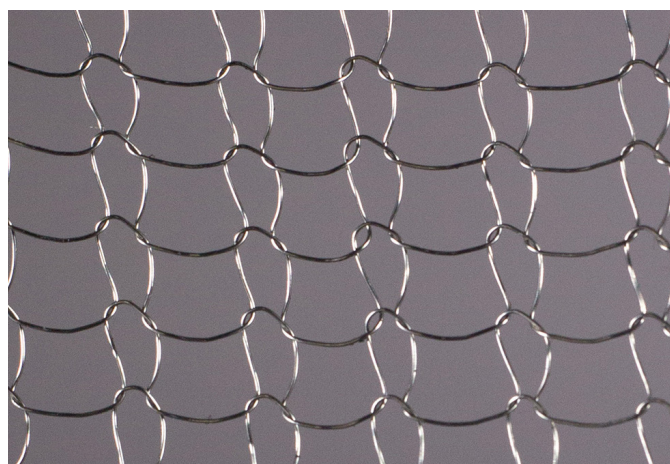

KnitMesh Technologies® knitted wire mesh can be used as a strong, lightweight and flexible barrier for animal and bird enclosures. This can be either to keep specific animals or birds in, or to keep pests and/or predators out. Mesh type, material and finish can all be tailored according to specific customer requirements.

Product Details

KnitMesh Technologies® enclosure mesh is made according to a 'standard' stitch pattern, but with sufficient options to allow mesh to be tailored for most common applications.

Property	Options
Material	304 Stainless Steel, Other
Finish	Plain, Black Oxidised, Other
Wire Diameters	0.28 - 0.5mm
Roll Widths	0.5 - 2m
Roll Lengths	Up to 50m

Enlarged photograph of KnitMesh's 'standard' enclosure mesh. Finish is as-knit 304 stainless steel. Other finishes available on request
