

Non-Mesh Products

KnitMesh Technologies® are the acknowledged technical leaders in the design and manufacture of innovative knitted wire mesh solutions.

Perhaps less well known is they have also been designing and manufacturing assembly and sub-assembly devices which incorporate their knitted mesh.

Design Solutions

KnitMesh is not limited to off-the-shelf design solutions, and works with customers to create bespoke engineering solutions to a wide range of problems.

Materials Technology

As with its range of knitted wires, KnitMesh engineered products are available in a wide selection of materials including alloys, carbon and stainless steels.

Value Engineering

By utilising the latest manufacturing techniques, KnitMesh are able to provide custom solutions which design cost out and value in.

Benefits

- Reduce number of suppliers and supply chain complexity
- Quality guaranteed as an ISO9001, TS16949 supplier
- Assembly simplified through supply of sub-assemblies and reduced number of components
- Cost reduction through value engineering

Comprehensive Service

With world-class manufacturing facilities, and ISO9001 quality accreditation, KnitMesh Technologies has a reputation for providing quality products at competitive prices.

KnitMesh Technologies engineers are ready to help you create the product solution you need.
